Scalar Projection and Dimensional Selection in QATNU SRQID: Emergent Clock Geometry, Effective Dimension, and the Stability Window of Observable Worlds

This edition asserted scalar clock closure and dimensional selection in the simulator. Nine source/window repairs restored closure in zero cases. The dimensional-selection claim lacks its proposed scalar foundation.

Manuscript · p. 1, central claim

A Test Protocol for Scalar Timing Closure and Dimensional Selection

Evidence · Scalar source/window residual audit / Clock integrity repair · November 12
