Validating QATNU SRQID Physics in the Current Simulator: Exact-Diagonalization Evidence at N=4 and N=5

The November 2025 simulator edition used a Ramsey pulse proportional to a rank-one projector. With repaired unitary axes and diagnostics, some path landmarks survived, but the registered star-graph holdout failed. The clock-law validation claim is withdrawn.

Manuscript · pp. 1–3, validation claims

SRQID locality bound

Evidence · Clock integrity repair · November 12 / Scalar source/window residual audit
