The Universe as Its Own Computer: Understanding Reality Through Quantum Information Dynamics

This synthesis used a projected spin-2 proxy and a threshold-arrival speed to claim numerical validation. The proxy does not identify a microscopic tensor sector. The threshold speed is distinct from the mathematical Lieb–Robinson bound.

Manuscript · pp. 1, 5, 7–8

SRQID locality bound

Evidence · QATNU/SRQID dated scientific review / Clock integrity repair · November 12
